## SUBJECT INDEX

- A
- Acetate  
and biosynthesis of amino acids, 127  
metabolism of, 154-55  
 $\alpha$ -Acetolactate  
metabolism of, 156-57  
Actinomycin D, hydrolysis products of, 177  
Actinomycins, 177-78  
Adaptation  
to acetone, 54  
to antibiotic resistance, 200-2  
to chloramphenicol, 54  
to proflavine, 54  
to propamidine, 54  
Adaptive enzymes  
synthesis of, by cell particulates, 180-81  
Adjuvants, use of, during immunization, 351-52  
Agglutination (conglutination), of red blood cells, 379-82  
Agricultural practices  
and plant infections, 303-6  
Algae, genetics of, 72-73  
Amino acid decarboxylases, 163-64  
Amino acid metabolism, effect of chloramphenicol on, 187-88  
Amino acid pool, in Neurospora, 48  
Amino acids  
and bacteriophage production, 128  
basic  
metabolism of, 130  
role of, 130-31  
C. kluyverii biosynthesis of, 157  
and chloramphenicol production, 175  
decarboxylation of, and hydrogen retention in, 163-64  
dicarboxylic, and biosynthesis of amino acids, 129-30  
fixation of acetate in, 127  
metabolism of, 160-61  
and microbial nutrition, 126-34  
miscellaneous effects of, 133-34  
mutants requiring, 46-48  
and penicillin production, 174  
sulfur, metabolism of, 131-33  
see also individual acids  
p-Aminobenzoic acid  
as growth factor, 117-18  
and pantothenate synthesis, 117-18  
Alanine  
influence of, on spore germination, 397  
population changes induced by, 128  
Alanine racemase, 164  
Antagonism  
definition of, for antibiotic effects, 209-11  
and synergism and antibiotic action, 208-13  
Antibiotics, 173-226  
action of, on bacterial spores, 391-92  
antiviral activity of, 242-44  
biosynthesis of, 174-78  
chemistry of, 174-78  
clinical significance of, 205-8  
combined use of, and clinical effects, 211-13  
complications of therapy with, 213-14  
development of resistance to, 53-55, 198-208  
and clinical significance, 205-8  
effects of  
on antibody response, 361  
on immune response, 350  
mechanism of acquired resistance to, 202-5  
miscellaneous effects produced by, 197-98  
miscellaneous, properties of, 177-78  
mode of action of, 178-98  
nature of increased resistance to, 202-5  
resistance of staphylococci to, and phage types, 207  
superinfection following use of, 213-14  
synergistic and antagonistic actions between, 208-13  
toxicity of, 213  
use of, against plague, 269  
variable effects with combined use of, 211-13  
Antibodies  
combination of, with antigen, 370  
incomplete, 373  
valence of, 371  
Antibody plateau  
factors influencing, 354  
Antibody response  
after ionizing radiation, 338-43  
following irradiation of the spleen, 340  
following irradiation and previous exposure to antigen, 341-42  
Antigen-antibody  
ratios of, in aggregates, 371-72  
Antigen-antibody aggregates  
long range forces in, 370-71  
nature of complement fixation by, 381-82  
structure of, 369-86  
Antigen-antibody-complement systems  
and plasmin-complement  
376-78  
Antigen-antibody reactions  
theories of, 371-73  
Antigenic structure, of P. pestis, 258-59  
Antigenic variation, 51-52  
Antigens  
combination of, with antibodies, 370  
competition between, 358-59  
gonococcal, 321  
mixed, for immunization, 358-59  
persistence of, following immunization, 353-54  
tolerance to, 355-56  
value of living versus inactivated, 356-57  
Arabinose, fermentation of, 153  
Arginine dihydrolase, 160-61  
Aromatic rings, biosynthesis of, 164-65  
Ascomycetes, genetics of, 70  
Aseptic meningitis  
see Meningitis, aseptic  
Asparagine, precursor of, 47  
Aspartic acid, role of, in purine synthesis, 161  
Autogamy, in protozoa, review on, 56  
Avian erythromyeloblastic leucosis virus, morphology of, 37

## B

- Bacitracin, composition of, 176-77
- Bacteria
- antibiotic-resistant, clinical significance of, 206-8
  - continuous flow cultures, apparatus for, 102-6
  - development of increased resistance to antibiotics by, 200-5
  - growth of, 97-110
  - heterothallism in, 67-68
  - international codes for nomenclature of, 6-15
  - multiple types of antibiotic-resistance variants of, 200-2
  - new, sources of description of, 3-4
  - resistance of, to antibiotics, 198-208
  - resting, action of streptomycin on, 186
  - rules for nomenclature of, 4-5
  - synchronous growth of, 97-98
  - systems of classification of, 1-2
  - taxonomy of, 1-20
  - theory of growth in continuous flow cultures, 98-102
  - variation in resistance to antibiotics by, 200-2
- Bacterial genetics, 67-69
- Bacteriocins, 66-67
- Bacteriophages
- action of, on *P. pestis*, 256-57
  - amino acid requirements for reproduction of, 128
  - DNA in, 75
  - intracellular growth of, 61-62
  - invasion by, 60-61
  - the lysogenic cycle and, 63-64
  - morphology of, 59-60
  - new systems of, 62
  - recombinations in, 62-63
  - staphylococcal types, and resistance to antibiotics, 207
  - taxonomy of, 59-60
- Basidiomycetes, genetics of, 71
- Biocytin, 120
- Biotin
- forms of, 119-20
  - as growth factor, 119-20
  - role of
    - in enzyme synthesis, 148
    - in metabolism, 166
  - substitution of fatty acids for, 166

- Booster response, during immunization, 354-55
- Bornholm disease
  - see Meningitis, aseptic
- Butyric acid, oxidation of, 167

## C

- Cancer, antibiotics against, 173
- Capsules, directed antigenic changes in, 152
- Carbohydrate metabolism, mutations for, 50-51
- Carbon dioxide
- stimulation of growth of *Neisseria* by, 326
- Carbon dioxide fixation by *B. rettgeri*, 166
- by sulfur bacteria, 165
- Carboxamide, and purine nutrition, 125
- Carcinogens, mutagenic action of, 83-84
- Catechol, oxidation of, 145-47
- Cellulose, biosynthesis of, 151-52
- Chemotherapy
- of plague, 268-70
  - of virus infections, 242-44
- Chloramphenicol and amino acid metabolism, 187-88
- bacterial action on, 190
- development of resistance to, 54
- mode of action of, 187-91
- molecular structure and specificity of, 190-91
- and phage maturation, 61
- production of, 175-76
- Chicken pox virus, morphology of, 29
- Citric acid
- dissimilation of, 156
  - metabolism of, 149
- Citric acid cycle, 154
- Citrovorum-folic acid factor, 115-17
- Citrulline-ornithine conversion, 160-61
- Classification, rules of nomenclature for, 4-5
- Classification of bacteria, systems of, 1-2
- Clinical effects
- of combined use of antibiotics, 211-13
- Clinical significance of antibiotics, 205-8
- Clinical significance of antibiotic-resistant bacteria, 205-8
- Coenzyme A, role of pantothenate in synthesis of, 118
- Coenzyme, folic acid, 116
- Coenzymes, miscellaneous studies on, 162-64
- Complement, 373-78
- activities of components of, 380-82
  - effect of plasmin on, 376-78
  - and structure of aggregates, 369-86
- Complement C'3, inactivation of, 376
- Complement fixation, 374
- general nature of, 381-82
- influence of ions on, 375
- protein uptake during, 374-76
- Conglutination, 379-82
- factors influencing, 380
- Coxsackie infections
- epidemics of, 281-82
  - factors influencing, 278-79
  - family spread of, 283-84
  - miscellaneous, 282-83
  - pancreatic lesions in, 277
  - and poliomyelitis, 287-91
  - tissue changes in, 284-85
- Coxsackie viruses, 277-96
- clinical manifestations of
- Group B, 279-83
  - groups and types of, 277
  - morphology of, 38, 284-86
  - nomenclature of, 291-92
  - occurrence of, in sewage, 287
  - pathological changes induced by, 284-85
  - reviews on, 292
  - and sanitary practices, 286-87
  - stability of, 286
  - susceptibility to, 277-78
- Culture methods, continuous flow, 102-6
- Cultures, continuous flow, applications of, 106-9
- Cytochrome
- mutants deficient in, 50
- Cytoplasmic factors
- influence in heredity, 55-56

## D

- Death, of spores, time-survivor relationships, 396-97
- Dihydroxy acid dehydrase, and amino acid synthesis, 47
- Disease control, of plants, 314-16
- Dissociation, of *P. pestis*, 255
- Division, synchronous, 84
- DNA
- chemical methods for study of, 75
  - helical structure of, 75
  - structure and function of,

74-77  
Dormancy, of bacterial spores, 388-89

E

Elementary bodies  
psittacosis-lymphogranuloma group, 230

Encephalites, 37

Encephalomyocarditis virus, morphology of, 37

Endotoxins, neisserial, 330-31

Environment, effect of, on plant diseases, 313-14

Enzymatic constitution, and gene action, 57-58

Enzymes  
adaptive, factors influencing formation of, 148-49  
bacterial, miscellaneous, 151  
cellular location of, 150  
formation of, in cell extracts, 161-62  
induced synthesis of, 58-59, 148-49  
isomeric specificities of, 145-48  
microbial, 145-51  
role of biotin in synthesis of, 148

Epidemiology, of plague, 263-67

Equine encephalomyelitis virus, morphology of, 37

Erythromycin, properties of, 177

Evolution, and population genetics, 73-74

Extra-sexual reproduction in fungi, 71

F

Fatty acids, biotin replacement by, 166

Fluoride  
inhibition of polysaccharide synthesis by, 152  
mechanism of action of, 149

Folic acid  
active forms of, 115-16  
antagonists of, 126  
as coenzyme, 116

Folic acid-citrovorum factor, 115-17

Formate exchange, 155-56

Fowl plague virus, 34-35

Fowl pox virus, 26

Fungal infections, antibiotics against, 173-74

Fungal infections of plants, 297-318  
inhibition by other organisms of, 304-5  
quiescent period in, 307

Fungi  
behavior of germ tubes of, 297-99  
extra-sexual reproduction in, 71  
genetics of, 70-72  
penetration of plant material by, 297-306  
penetration of plants by, through wounds, 302-6  
relationships between, in plant infections, 304  
secondary infection of plants by, 306  
specialized  
infection of resistant plants by, 310-13  
plant infection by, 309-10

G

Galactosidase  
genetic control of, 50-51  
induced synthesis of, 58

$\beta$ -Galactosidase  
adaptive formation of, 148  
biosynthesis of, 148

Galactowaldenase, 153

Gene action, 57-59

Genetic analysis of intermediate metabolism, 46-51

Genetic material, changes of, 78-80

Genetic material, nature of, 74-84

Genetic recombination, in lysogenic phages, 64-65

Genetic segregation of lysogenicity, 65-66

Genetics  
of algae, 72-73  
of animal viruses, 67  
of bacteria, 67-69  
of fungi, 70-72  
methods for study of, 84-85  
of microorganisms, 45-96  
of populations, 73-74  
of protozoa, 73  
reviews on, 45  
of slime molds, 73  
transmission, 59-74  
of yeasts, 71-72

Germination of spores, 389-96  
media for, 389-90  
period of dormancy in, 388-89

Glucose

fermentation of, by B. rettgeri, 166

Glutamic acid, metabolism of peptides of, 161

Glyceraldehyde-3-phosphate dehydrogenase, 150-51

Glycerol, metabolism of, 147-48

Gonococci

action of drugs on, 327  
antigens of, 321-23  
common antigen with Pasteurellae, 321  
cultural requirements of, 324-26  
flocculation tests for, 321  
metabolism of, 327-29  
serological relationships of, 321-23

Gonorrhea, incidence of, 319

Granulocyte count, relation to survival following radiation, 336

Growth  
of bacteria, 97-110  
continuous flow, theory of, 98-102  
of psittacosis-lymphogranuloma viruses, 236-40  
synchronous, 97-98  
of viruses, biochemical aspects of, 240-42

Growth factors  
influence of, on spore germination, 390  
for microorganisms, 111-44  
see also individual factors  
miscellaneous, 135-38

H

Haemolysis, see Hemolysis

Heat resistance tests, effect of media on, 390

Hemin, as growth factor, 138

Hemolysin, combination of, with red blood cells, 378-79

Hemolysis  
factors influencing, 378-79  
stages of, 378-79

Herpes simplex virus  
morphology of, 29-30

Herpes zoster virus  
morphology of, 29

Heterothallism, in bacteria, 67-68

Histidine  
biosynthesis of, 160  
decarboxylase, cofactors for, 164

Human papilloma virus, morphology of, 36-37

I

Immune mechanisms  
supplementation of, by penicillin, 184

Immune response  
general pattern of, 349-55  
specific pattern of, 350-51

Immunity  
duration of, 352-53  
plague

- mechanism of, 262-63
  - serological tests for, 261-62
- Immunization, 347-68
  - against plague, 267-68
  - antibody plateau following, 354
  - antigenic competition during, 358-59
  - duration of resistance following, 352-53
  - effect of age on, 360-61
  - effect of antibiotics on, 350, 361
  - effect of booster shot on, 354-55
  - effect of susceptibility on, 360-61
  - host factors influencing, 359-62
  - influence of amount of antigen on, 349-50
  - miscellaneous factors influencing, 362

pyrimidine-requiring, 48  
resistant to miscellaneous  
agents, 52-53  
vitamin-requiring, 48-49  
**Mutation**  
to antibiotic resistance, 53-  
55, 200-2  
effect of nuclear detonation  
on, 83  
lag in, 84  
methods for study of, 84-85  
in psittacosis-lymphogranu-  
loma group, 242-44  
**Mutation rate**, effect of  
number of nuclei on, 84  
**Myocarditis**, Cocksackie  
viruses and, 281  
**Myxoma virus**, morphology  
of, 28  
  
**N**  
  
**Names**  
conservation and rejection  
of, 11-14  
generic, use of, 14-15  
legitimate, for micro-  
organisms, 7  
**Nomenclatural codes**, 5  
**Nomenclature**, international  
codes for, 6-15  
**Neisseria**, 319-34  
action of drugs on, 326-27  
carbon dioxide stimulation  
of growth of, 326  
cultural requirements of,  
324-26  
endotoxins of, mode of  
action, 330-31  
metabolism of, 327-29  
miscellaneous species of,  
323  
pathogenicity of, 329-31  
physiology of, 324-29  
**Neisserial infections**, 319-34  
pathogenesis of, 329-31  
**Newcastle disease virus**,  
morphological forms of,  
32-34  
**Niacin**  
biosynthesis of, 48  
synthesis of, 122  
**Nicotinic acid**, as growth  
factor, 122  
**Nitrate**, metabolism of, 159  
**Nitrate reductase**  
molybdenum in, 159  
**Nitrite**, metabolism of, 159  
**Nitrogen**, metabolism of, 158-  
62  
**Nitrogen fixation**, 158-59  
hydrogen source for, 158-59  
**Nomenclature**, conservation  
and rejection of names  
in, 11-14  
Judicial Commission for,  
9-11

significance of nomencla-  
tural types in, 8-9  
**Nucleic acid**  
antagonists of, 126  
synthesis of, 76-77  
effect of chloramphenicol  
on, 188-89  
effect of tetracyclines on,  
192-93  
**Nucleic acid metabolism**  
action of penicillin on, 179-  
81  
**Nutrition of microorganisms**  
111-44  
**Nutrition of P. pestis**, 254-55

O

**Orchitis**, as complication in  
Cocksackie infections,  
281  
**Ornithine**  
biosynthesis of, 126-27  
precursors of, 46  
**Ornithine-citrulline conver-**  
**sion**, 160-61  
**Orotic acid**  
analogues of, 125  
excretion of, 125  
**Oxidative assimilation**, 153-  
54

P

**Pantoate**, biosynthesis of,  
162-63  
**Pantothenic acid**  
and coenzyme A synthesis,  
118  
as growth factor, 118-19  
synthesis of, 117-18  
**Papilloma viruses**,  
morphology of, 36-37  
**Pasteurella pestis**  
antigenic structure of, 258-  
59  
bacteriophage action on,  
256-57  
dissociation of, 255  
growth of, 254  
metabolism of, 256  
morphology of, 254  
nutrition of, 254-55  
pathogenicity of, 255  
toxin of, 257-58  
varieties of, 253-54  
viability and virulence of,  
256  
**Pathogenicity**, see **P. pestis**  
**Penicillin**  
action of, on viruses, 242-  
43  
binding of, 181-82  
binding and toxicity of,  
181-82  
development of resistance  
to, 54  
  
factors modifying bacteri-  
cidal action of, 182-84  
mechanisms of resistance  
to, 198-200  
mode of action of, 179-84  
new forms of, 175  
phenylacetic acid as pre-  
cursor of, 174  
production of, 174-75  
and protein and nucleic  
acid metabolism, 179-81  
**Penicillinase**, 54, 199-200  
production of, 199-200  
**Pentoses**, metabolism of,  
153  
**Peptides**  
as growth factors, 134-35  
streptogenin activity of,  
134-35  
**Phages**, see **bacteriophages**  
**Phagocytes**  
increased capacity of  
against **P. pestis**, 263  
**Phenogenetics**, 46-55  
**Phenotypic variation**, 56-57  
**Phenylacetic acid**, as  
penicillin precursor, 174  
**Phenylalanine**  
antagonistic effects with  
phenylserine, 128  
metabolism of, 128  
**Photoautotrophs**, mutations  
in, 51  
**Photoreactivation**, 81-82  
**Pigments**, biosynthesis of,  
49-50  
**Plague**, 253-76  
epidemiology of, 263-67  
etiological agent of, 253-57  
fleas as reservoir of  
infection, 265-66  
human ectoparasites and,  
266-67  
immunity against, in  
animals, 260-61  
immunology of, 257-63  
mechanism of immunity  
against, 262-63  
present status of, 270-72  
prophylaxis against, 267-68  
etiological, 267  
personal, 267-68  
prospects for future of, 270-  
72  
rat as reservoir of infection,  
264-65  
reservoirs of infection, 263-  
67  
serological tests for  
immunity to, 261-62  
serum therapy against,  
269-70  
therapeutics of, 268-70  
vaccines against, 259-61  
**Plant diseases**  
effect of environment on,  
313-14

  - Table, 23
  - encephalitides, morphology of, 37
  - enteric, and sanitation, 286
  - general morphology of, 38-40
  - influenzae, mumps, Newcastle group of, 30-35
  - International Codes for Nomenclature of, 6-15
  - morphology of, 21-44
  - poliomyelitis-like, morphology of, 38
  - pox group, morphology of, 25-30
  - psittacosis-lymphogranuloma venereum group, morphology of, 24-25
  - Russian classification of, 2-3
  - structural similarities to bacteria, 29
  - tumor, morphology of, 35-37
  - see also individual ones
- Virus infections, antibiotics against, 173
- Vitamins
  - biosynthesis of, 162-64
  - mutants requiring, 48-49
- Vitamin B<sub>12</sub>
  - forms of, 112-15
  - as growth factor, 112-15
  - and methionine biosynthesis, 49
  - role of, 112-15
- W
  - Warts virus, morphology of, 36-37
  - Water, enteric viruses in, 286
- X
  - Xylose isomerase, 153
- Y
  - Yeasts
    - genetics of, 71-72
    - obtaining mating types of, 85
  - Yeast, parasexual recombination in, 72
